

## Meeting Notes

- Use of limited color (black/dark grey, white, an accent color of sorts? Maybe red?)
- Focus on scale (play around with the use of super big font etc)
- Emphasis on fun pull-out quotes
- Simple animations with CSS, would like fun animations of the text basically! (you can find animation help online so it shouldn't be hard at all!)
  - Like loose letters floating around the page
- Website is “fun and playful” through the layout/ use of text on the page
- Example of a font focused website: <https://www.frotype.xyz/in-use>
- I will provide a detailed content outline by the end of day saturday!!
